## **DETAILED ACTION**

### ***Response to Amendment***

The amendment filed 01/03/02 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: There is no support in the specification for a limitation regarding the relative motion between the tank and the substrate, or the solution and the substrate.

Applicant is required to cancel the new matter in the reply to this Office Action.

### ***Response to Arguments***

Applicant has argued that the method of Erk does not produce a rough surface as in the claimed invention and is therefore not a proper reference. The argument is not found persuasive because the surface is modified and a rough surface is produced as cited previously.

Applicant has argued that the claimed invention is not concerned with whether the bubbles are formed in the solution before the substrate is immersed and therefore distinguishes the claimed invention over the prior art. The argument is not found persuasive. One of ordinary skill in the art would recognize that it makes no difference whether the bubbles are formed in the solution before or immediately after the substrate is immersed because the steps occur approximately at the same time and the surface treatment and results would be unaffected by this small discrepancy.

Art Unit: 1763

Applicant has argued that although the original specification does not recite the limitation that no relative motion between the substrate and the solution that the claimed invention recites the limitation inhehrently. The argument is not found persuasive because no evidence is provided from the specification to show inherency. Further, no evidence is provided that the results produced (i.e. rough surface) would be affected. Since the rotation suggested in Erk is quite slow, e.g. 1.5 rpm, one of ordinary skill would expect the result to be the same.

### ***Allowable Subject Matter***

The indicated allowability of original claims 5-7 and 11-16 is withdrawn in view of. U.S. Patent 4,956,035 to Sedlak and IBM Technical Disclosure Bulletin Vol. 30, Issue 6, Page 244. While amended claims 5-7 and 11-16 are not rejected over the prior art, the claims as originally filed (i.e. without the new matter pointed out above) would be subject to rejection based on a combination of Erk in view of U.S. Patent 4,956,035 to Sedlak and IBM Technical Disclosure Bulletin Vol. 30, Issue 6, Page 244.

Claims 17 and 18 are allowed.

Claims 1-16 and 19-28, as amended, are not rejected over the prior art.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1763

Claims 1-16 and 19-28 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support in the specification for a limitation regarding the relative motion between the tank and the substrate, or the solution and the substrate.

### *Conclusion*

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberts Culbert whose telephone number is (703) 305-7965.

The examiner can normally be reached on Monday-Friday (7:30-4:00).
